Software Developer

Profile

- Software developer with 2 years of experience building end-to-end Windows applications in C# (.NET)
- Bachelor's degree in Computer Science with an extensive knowledge in algorithms, data structures, and software architecture
- Experienced in backend systems, Android development, and SQL database design
- Experienced in working in team-based and high responsibility environments
- Awarded 1st place for "Smishing Buster", a machine learning-based Android application detecting SMS phishing attacks

Technical Skills

Languages : C#, Python, Java, SQL

Frameworks & Technologies: .NET (WPF, Avalonia), TensorFlow, ONNX, RabbitMQ, SQLite

Tools & Environments: Visual Studio, Git, Linux/WSL, PowerShell

Work Experience

Academic Assistant

Sapir Academic College

October 2024-May 2025

Sderot, Israel

- Provided group tutoring sessions for ~15 student groups, focusing on debugging problem-solving and software design practices
- Delivered individualized tutoring to address conceptual gaps and strengthen coding proficiency for students
- Evaluated assignments and projects, providing detailed written and verbal feedback on code structure, efficiency, and clarity
- Collaborated with the faculty to identify common student weaknesses and adjust tutoring sessions accordingly

Software Developer

LevelFive (Freelance work)

September 2024-December 2024

Rishon Le-Tzion, Israel

- Designed and implemented a client-requested tutoring tool in C# (.NET, WPF), using the MVVM design pattern, with separate student and instructor modules
- Understood and translated the clients needs to system workflows, UI design and functional architecture
- Structured the application for maintainability and future expansion through proper separation of UI and business logic
- Conducted software testing within the company and delivered iterative updates based on the clients feedback ensuring correctness and usability

Paramedic

Terem Urgent Care / Magen David Adom

January 2017-May 2024

Tel-Aviv, Israel

- Delivered emergency medical treatment in fast-paced, high-pressure environment requiring focus and rapid decision making, following the health and safety guidelines to promote rapid recovery.
- Collaborated with multidisciplinary medical and logistical teams to ensure effective patient care
- Maintained composure, precision, and clear communication under critical conditions

Projects**“SmishingBuster”**

- Developed an Android application (Java) with a robust backend to detect SMS phishing using machine learning and heuristic analysis
- Designed a python REST API, integrated with RabbitMQ to offload the task of message analysis to asynchronous workers, and FCM integration to send push data from the server back to the correct mobile device
- Implemented a distributed “message analysis” module combining research-based heuristic elements, NLP-based classification and static link validation to determine message safety

Education**Bachelor of Science Degree in Computer Science**

Sapir Academic College

July 2024

Sderot, Israel

Paramedic Diploma (EMT-P)

Paramedic's School – Magen David Adom

January 2017

Ramat Gan, Israel
